

Fish are classified as to degree of difficulty by point value. Aquarists must spawn and raise at least 6 fry to 60 days of age (after hatching or live delivery). The BAP Chairman or an NJAS Board member must witness the submission, and the fish must be put up in an NJAS auction for sharing with the membership. For more details, see the BAP Handbook on the website at <https://njas.net/> (or scan the QR code)

Happy breeding!

Paul Nitzsche
