

BAP Report

The BAP activity in February and March came from our veteran breeders. In February Karen Haas led with two entries, including the L398 Pleco, *Panaqolus tankei*. Roy Allen entered the Red jewel cichlid, now classified as *Rubricatichromis exsul*. Finally, George Savapoulas submitted a second spawn of his Red cherry shrimp, *Neocaridina denticulata sinensis*. George also had the lone two BAP entries in the March auction, including *Tropheus* sp.

“Red” Kalindi. Keep those entries coming!
